Settled, and what is left

The floors, entrances and both double-height spaces are confirmed. Nothing here blocks the homepage.

1. Rooms still marked *Guess* (#7, #10, #12, #17, #18, #22, #23, #31) are left as they are; the walls are what matter for the model.
2. Which inside stair joins the ground and first floors is still to be confirmed on the plan.
